Take Note

Explore the Wonders of the *Arcadia* Art Installation

Arcadia is a year-long public art project using sensor and computer software to translate the natural rhythms of medicinal and edible plants into a stream of ever-changing music and light.

Arcadia may be experienced live online 24 hours

[here](#) or from inside the President Park Greenhouse on the Fairfax Campus following Mason's social-distancing guidelines.

[Learn more about Arcadia.](#)

Calendar

MORE EVENTS

GMU's Homepage (<https://www2.gmu.edu>)

8 columns, fairly even and consistent in spacing

My Anime List's Homepage (<https://myanimelist.net>)

12 columns, roughly works well, however smaller boxes aren't consistent in sizing between rows

Note: I wasn't sure how to do a guide/grid system, so I made the columns and rectangles in photoshop. Since these were both screenshots, the sizing was not consistent and the rectangles may be off by a few pixels or so.
