

Sitemap 1

Pros: Various tabs, clear distinction and layout. Easy to see things without everything being too cluttered

Cons: Site may be too spread out for the amount of work I currently have and can put into a portfolio. May need to condense the portfolio pages all into one page

Sitemap 2

Pros: Two distinct tabs/sections of the sites with different information (information bout myself and works done by me)

Cons: Site may be too clumped together, categories in about me may not be entirely related to one another
